

Healing Hand & Body Lotion (with quince extract)

Product Description:

Soothing relief for hands that are sore, dry or chapped. A premium formulation hand cream packed with moisturizers and soothing ingredients directly from nature's medicine chest. Your hands will look beautiful and feel soft and smooth. It's great for the feet too!

Quince is grown in southern Asia and Europe, and is long-used for its healing and soothing properties. However, it is an expensive ingredient due to its growth and harvesting requirements, so it has been replaced by cheap substitutes in most body care products. It reduces irritation and helps heal chapped inflamed skin.

- Soothes and softens dry, chapped, sore skin
- No animal testing
- Light natural fragrance
- Contains soothing quince extract
- Moisturizes and prevents moisture loss
- Great for dry, chapped feet too!

Additional Product Details:

Since the dawn of time the human hand has been the source of inspiration for poets, fortune-tellers and lovers. Our hands help us learn, love, work, play, tend and care. They are one of our primary connections to our environment and society.

But work-worn hands often suffer from neglect that leaves them rough, dry and aged. Harsh cleaners, frequent immersing in water and harsh weather are just some of the conditions that can damage your skin.

In order to stay healthy, vibrant and smooth our skin requires daily care and maintenance including gentle washing and moisture replacement.

CAERAN uses only the highest quality raw ingredients to ensure you get the best product available. And we list every ingredient in every product, as well as provide information on ingredient actions and function. We want you to know exactly what you're getting, Nature Friendly Products for your Natural Lifestyle.

Give your hands a hand with CAERAN Healing Hand & Body Lotion with quince.
